

DREEN[®]ELEGANCE

ELEGANT ROOFTOP PAVING SYSTEM

FOR A LUXUROUS LOOK AND FEEL

Enjoy a stylish rooftop terrace with the Dreen®Elegance rooftop paving system. In addition to its attractive appearance, the Dreen®Elegance system is easy to install and maintain, enjoying superb stability and excellent drainage.

STYLISH

A rooftop terrace is often an extension of the living room, and the focal point of outdoor living. With our Dreen®Elegance system, you can create a stylish and appealing rooftop terrace.

EASY MAINTENANCE

Thanks to its blasted surface, this tile has a slightly rough texture, making it very non-slip. Moreover, this surface gives the tile a very natural look because the natural stone granules are beautifully visible. After blasting, the surface is impregnated, which makes the tile easier to maintain and provides extra protection against limescale deposits.

PROPERTIES

- † Natural, luxiours look and feel
- † Attractive colours
- † Impregnated surface
- † Ease maintenace
- † Adjustable heights
- † For flat and sloped roof surfaces
- † No standing surface water
- † Non slip surface

DRY SURFACE

The space below and beneath the slabs ensures balanced drainage. Thanks to this system, the roof is well aerated and the surface remains dry.

CLEAN LINES AND STABILITY

Dreen®Elegance creates a stable and level walking surface. The slabs are attached to the underlying fixplate lock system with removable corner pieces. This element fixes and locks the slabs into position, but because it is a demountable system the waterproofing remains accessible (if necessary). The system also ensures straight joints between the slabs.

RAISING AND LEVELLING

The rooftop terrace can be raised to the required height with the use of our adjustable pedestals. The adjustable pedestal system consists of an adjustable base with height rings and a fixplate lock. The fixplate lock element is mounted on top of both systems and the Dreen®Ceramica slabs are positioned and fixed on this top element. The system guarantees a level rooftop terrace. At the edges, the special edge zone system ensures stability and good support and containment of the slabs.

TECHNICAL SPECIFICATIONS DREEN® ELEGANCE

Dimensions	600 x 600 x 40 mm
Weight per slab	32,4 kg
Weight per m ²	90 kg
Number per m ²	2,78 slabs
Bevelled edge	3 x 3 mm
Thickness tolerance	± 0,5 mm
Length and width tolerance	± 2 mm
Failure load	7 kN

LOGISTICS

Packaging unit	26 slabs per pallet (9,35 m ²)

WHAT IF THE WORLD WERE TWICE AS BIG

It can be, as far as we're concerned. Our world, twice as big. A world that we are helping to design and construct perfectly with our roof slab systems. Our many years of experience have made us the number one expert in rooftop paving. For sustainable roofs, livable roofs for socialising. We interact with architects and contractors every day. With roofers and project developers. Creators and constructors. We listen to them, work with them and advise them. That's why we're the number one party with the best rooftop vision. It's our higher ground.
